

STARWEBX SUMMER INTERNSHIP

Become a job-ready **developer** in six weeks.

A hands-on, AI-powered summer internship. Start from zero — no prior coding needed. Learn to build real apps with modern AI coding assistants, and finish by creating your own simple AI agent.

6 weeks Summer internship	AI-powered Modern workflow	100% Hands-on labs	Certificate On completion
-------------------------------------	--------------------------------------	------------------------------	-------------------------------------

THE CURRICULUM

- 01 Web, Git & AI tools**
First HTML page, a few basic Linux commands, Git & GitHub, and setting up AI coding assistants (ChatGPT, Copilot).
- 02 Styling with CSS**
Colours, fonts, layout, Flexbox & Grid, mobile-friendly design — with AI helping you fix styling fast.
- 03 JavaScript basics**
Variables, functions, clicks and interactivity, one small example at a time, with an AI co-pilot.
- 04 PHP & your first AI API call**
How a site talks to a server, forms and sessions, then calling an AI API from your own code.
- 05 Data with MySQL**
Simple tables, basic queries, connecting PHP to the database, AI help for writing SQL.
- 06 Capstone: app + your AI agent**
Deploy your web app live, then build a simple AI agent as your standout project. Present it & prep your resume.

WHAT YOU GET

- ✓ A deployed web app + your own AI agent
- ✓ Internship completion certificate
- ✓ AI-first, industry workflow

WHO CAN APPLY

- ✓ Students and recent graduates
- ✓ Beginners welcome — start from zero
- ✓ Curiosity to build with AI

✓ Communication & soft-skills practice

✓ A laptop and internet

Apply online · Pay & enroll

Seat confirmed only after successful payment.
